 HEADER FOR 8 BRANCHING (CMY-Y108-G)
 HEADER FOR 10 BRANCHING (CMY-Y1010-G)

INSTALLATION MANUAL

Caution
 The incorrect selection of the type of branch pipe and the size of connecting pipe does not allow the air conditioner to provide the rated capacity. Please read this instruction manual carefully for correct mounting work.

1 The following parts are contained in this box. Please identify the quantity with types.

Header for 4 branching (CMY-Y104-G)

① Instruction	② Header	③ Header	④ Pipe cover - 1	⑤ Pipe cover - 2	⑥ Band
For liquid line	For gas line				
This sheet 1 sheet	1 pc.	1 pc.	2 pcs.	2 pcs.	4 pcs.

Usable for 3/4 branching
 (* For 2 branching, use the optional header for 2 branching.)

Header for 8 branching (CMY-Y108-G)

① Instruction	② Header	③ Header	④ Pipe cover - 1	⑤ Pipe cover - 2	⑥ Band	⑦ Sealing material
For liquid line	For gas line					
This sheet 1 sheet	1 pc.	1 pc.	Each 2 pcs.	4 pcs.	6 pcs.	Each 1 pc.

Usable for 5/6/7/8 branching

Header for 10 branching (CMY-Y1010-G)

① Instruction	② Header	③ Header	④ Pipe cover - 1	⑤ Pipe cover - 2	⑥ Band	⑦ Sealing material
For liquid line	For gas line					
This sheet 1 sheet	1 pc.	1 pc.	Each 2 pcs.	4 pcs.	6 pcs.	Each 1 pc.

Usable for 9/10 branching

Note 1) Please prepare the following materials in addition to the items above.

- (1) Tape for sealing of insulation material (2) Extension pipe for refrigerant circuit.

2) Please observe the items below for the mounting work.

- Observe the limit on refrigerant piping length in Table-3.
- Observe the limit on the connection of indoor units in Table-4.
- Connect the header to piping or plug/pipe by brazing. Non-oxidized brazing should be applied.
- The header is equipped with stopper. Push in the stopper until the pipe to be connected stops.
- No limitation is applied to the mounting posture.
- Be careful that foreign materials like dust will not enter into the piping at the connection work.
- Apply insulation material to all refrigerant pipings.
- The piping after the header branching can not be branched again. Be sure to connect it to the indoor unit.

Limitation on refrigerant piping length

Fig. 1 Note: Branch piping can not be applied after header branching.

Item	Pipe section	Allowable value
Total piping length	A + B + C + D + a + b + c + d + e + f + g	300 m or less
Farthest piping length (L)	A + C + D + g or A + B + d	150 m or less
Farthest piping length after 1st branching (ℓ)	C + D + g or B + d	40 m or less
Height difference between indoor and outdoor units (H)	—	50 m or less
Height difference between indoor units (h)	—	15 m or less

3) Selection of refrigerant piping size and use of header

- Prepare the pipe to be connected in the field.
- Determine the piping sizes of each part from Table-5, 6 and 7.
- The header can be connected to all piping sizes selected in the item 2. To match a specified piping size.
 - use the joint as it is.
 - use it by connecting the auxiliary pipe.
 Please conduct actual work by referring Fig 3 and Table-5 ~ 12.
- Cover the branch pipe end of the header, which are not in use, with the plugs 1 ~ 5 provided.

4) Mounting of cover (insulation material)

(i) CMY-Y104-G

(ii) CMY-Y108-G

- Insert the ②③ headers into the pipe cover 1 (2 pcs.) respectively, peel off the paper pasted on the inner surface of the ④ pipe cover, and catch the ②③ headers with the ④ pipe cover 1.

- Wind sealing material onto A-section of ②③ headers, [thin piping-small sealing material, thick piping-large sealing material], insert each header into ④ pipe cover 1, and put ②③ headers between ④ pipe cover 1.

Note) For a part where sealing material is overlapped, wind sealing material onto the header so that the overlapped part locates at the upper side when the 10 branch header is installed.

- Fasten both ends of the indoor side branching of the ④ pipe cover 1 with the ⑥ band as shown in the figure above. Cut off the surplus of the band.

- Mount the ⑤ pipe cover 2 onto the positions stopped with the plugs 1 ~ 5 provided. Fully seal the butting section of the pipe cover with a tape (field supply). (Insufficient sealing causes condensation dripping.)
