

FDTC AND FDT CASSETTE

Anti-draft panel (optional)

Flexible flap control to prevent direct currents.

4 extra flaps, individually controlled in each operating mode: they change the direction of the air flow and prevent the unpleasant sensation of direct currents.

UNPARALLELED COMFORT

The anti-draft panel ensures a uniform air flow and a comfortable temperature in the room, both in cooling and in heating: it can be controlled to instantly eliminate any air currents that are too cold or too hot.

Furthermore, the panel helps the unit to aim the air flow for correct and uniform diffusion in the room. The additional flaps are closed when the unit is not running.

Individual control of the four flaps (standard and anti-draft panels)

The flap control system lets you direct the air flow as needed

To reach people further away from the unit.

To reach only people who are feeling too hot or too cold.

To reach the warmest parts of the room.

NOTE

The flaps cannot be controlled individually using the IR remote control.

FDTC CASSETTE 60x60

Ultra-compact design

FDTC weighs just 14 kg. The height of the thin panel and the main body is just 248 mm, allowing for very simple installation.

Measurements reduced to 620 mm, ideal for application in European modular ceilings.

JUST 10 MM THICK

The FDTC panel perfectly adheres to the ceiling because it only protrudes 10 mm.

HONEYCOMB GRILLE

New grille design.

VERY COMPACT DESIGN

The panel dimensions adapt perfectly to European modular ceiling lattices.

 700 mm → 620 mm
previous model new model

Standard linear and honeycomb panels

Standard linear panel

Standard honeycomb panel

FDT CASSETTE 84x84

New standard and anti-draft panel colours to expand design possibilities in shops, offices and restaurants.

Anti-draft white panel

Standard black panel
